SUMMARY

Pre-final year B.Tech Information Technology student seeking software engineering, backend, data, or AI internship roles. Hands-on experience with Python, SQL, Pandas, Streamlit, and neural-network fundamentals. Strong foundation in data structures, object-oriented programming, database-backed applications, analytics dashboards, and LLM fine-tuning workflows.

EDUCATION

Bachelor of Technology in Information Technology | Rustamji Institute of Technology | 2023 - 2027 | **CGPA: 6.73/10.0**

Higher Secondary Education (12th Grade) | Kendriya Vidyalaya No.2 Bhopal | 2022 - 2023 | **Percentage: 69%**

Secondary Education (10th Grade) | Kendriya Vidyalaya No.2 Bhopal | 2020 - 2021 | **Percentage: 84%**

TECHNICAL SKILLS

Programming Languages: Python, SQL, HTML5, CSS3,

Databases: FastAPI, SQL Alchemy,, SQLite, PostgreSQL-ready application design

Data and AI: Pandas, Streamlit, analytics dashboards, stock forecasting logic, NumPy, CNNs, backpropagation, LLM fine-tuning

Core Concepts: Data Structures and Algorithms, Object-Oriented Programming, DBMS, API design

Tools: Visual Studio Code, GitHub, Pytest, Figma, Canva, Blender, PyGame

EXPERIENCE

S.T.E.M Engineer Intern | Frostrek LLP, Gurgaon | Dec 2025 - Jan 2026

- Contributed to training and fine-tuning workflows for Large Language Models (LLMs), focusing on model performance, accuracy, and iterative improvement.
- Collaborated on STEM and AI-focused technical tasks while strengthening practical understanding of Python, model behavior, and applied machine learning workflows.

PROJECTS

RetailIQ | Python, FastAPI, SQLAlchemy, SQLite, Pandas, Streamlit, HTML/CSS/JavaScript, Pytest

- Built a sales analytics and inventory forecasting platform for small retailers with product, customer, supplier, and sales data models.
- Created REST API endpoints for products, sales, revenue analytics, best-selling products, low-stock alerts, and stock-risk forecasting.
- Implemented forecasting logic based on recent sales velocity and added Pytest coverage for revenue and high-risk stock calculations.

City Pulse | Urban tech, real-time city tracking, map-based information system

- Developed a real-time, transparent city information tracker to reduce fragmented and delayed urban updates for citizens and officials.
- Presented the project at Sunhacks Hackathon 2025 and secured 5th position with the team.

GitHub: <https://github.com/SyntaxSociety6/City-Pulse>

CMU Deep Learning Projects | Python, NumPy, CNNs, neural-network layers, backpropagation

- Implemented neural-network components from scratch, including linear layers, activation functions, loss functions, convolution, pooling, and resampling modules.
- Built and tested custom CNN training components with forward and backward passes to strengthen deep-learning fundamentals.

ACHIEVEMENTS AND CERTIFICATIONS

- Secured 5th position in Sunhacks Hackathon 2025.
- Two-time Google Student Ambassador.
- Founder of Tech-Coding Club; mentored juniors and promoted coding culture.
- GUVI GEEKS Certified for Python and PyGame Programming Fundamentals.
